## MEDIA GUIDE

Communication & Security

## OUR JOB IS YOUR SECURITY...

**Millions of workers put themselves at risk every day for their professions: working in confined spaces, hostile environments, out-of-network dead zones, noisy and chaotic environments...**

At APPI-Technology, we develop and manufacture safety-driven communication equipment for critical mission teams in demanding professions. Our international client base trusts APPI to deliver comprehensive communication solutions to a wide range of applications: industries, civilian and military safety, transportation, public works, and more.

We are proud to offer a collection of Full-Duplex communication solutions that allow teams to maintain natural conversation no matter their location or environmental obstacles.

## ...SO YOU CAN FOCUS ON THE MISSION!

# A WORD FROM OUR FOUNDER

In founding APPI-Technology (formerly Boudysens), our mission was to lessen the number of unknowns faced by workers in high-risk environments (Rescue, Security, etc.) through technology, such as remotely tracking vitals.

We developed the APPI-PHY system to gather, transmit, and analyze physiological data in real time to give team's insight on each member's general situation. We quickly understood that the main factor to enhancing safety was, above all, access to a good, reliable and hands-free means of communication; thus we invented the APPI-Com system.

We perfected the APPI-Com working side by side with local critical actors – including firefighters and industry workers– getting real feedback from real professionals. That's what makes APPI so special: we are who we are today because of communication and teamwork.

Our story reflects our business ethic: improving the efficiency and safety of workers and mobile teams through communication technology: Communication & Security !

# OUR MISSION

*Improve the efficiency and safety of workers, regardless of their workplace, by simplifying their communication.*

# APPI-COM LR

## CONFERENCE-MODE RADIO

### COMMUNICATE DIFFERENTLY

APPI-Com is a long-range, wireless radio designed for professionals in high-risk, noisy, and confined environments and are designed to worn hassle-free no matter their protective gear.

This advanced hands-free communication solution works for teams of all sizes. The APPI-Com uses Full-Duplex technology to allow users to have a natural, conference-like conversation despite physical obstacles (walls, floors, etc.) and distance (around 4 Km).

What's more, the APPI-Com transmits through a secure network, without a master radio or a base station (SyncAll Patent). The SafeLine function gives users real-time data on who is connected. These systems adapt to every team : from 2 to 10 members ... or more!

Bluetooth connectivity, compact size and ease of use make the APPI-Com the best choice for professionals, from public works to

### THE SPECIFICATIONS

- Conference Mode (Full Duplex)
- No Push-To-Talk
- Up to 4Km in Range
- SyncALL Patent: No Base, No Master
- Large selection of headsets
- Compact / Robust / IP67
- Noise cancelling technology
- Lone Worker Protection: Relay LWP alerts(voice, sms, email, GPS) from out-of-network zones.
- Connection/disconnection alerts
- ONE radio for TWO
- Choose from 7 rubber cover colors

# APPI-COVR

## ALL-IN-ONE RADIO SYSTEM

### PROTECTION AND COMMUNICATION ALL-IN-ONE

The APPI-CovR Full-Duplex noise-canceling radio headset is designed for seamless communication in challenging environments. Equipped with a Push-to-Talk (PTT) button function and customizable VOX settings, it offers hands-free operation and clear audio.

The all-in-one system is easy to use, ensuring quick setup and efficient operation. The headset includes immobility warnings that improve safety by relaying an alert to the team or a remote contact. Perfect for professionals requiring reliable, real-time communication in noisy settings.

The radio headset includes immobility alerts to improve the safety of lone workers. It is the perfect solution for professionals who need reliable communication in noisy environments.

### ANDROID SAFETY APPLICATION

With APPI-Smart, control your APPI-CovR headset from your smartphone.

### THE SPECIFICATIONS

- Conference Mode (Full Duplex)
- Noise Suppression Technology
- Noise Attenuation: 31dB
- Up to 4Km in Range
- SyncALL Patent: No Base, No Master
- Lone Worker Protection : Immobility voice alerts/ relayed to smartphone
- Available as a Headband or as Helment attachments

# APPI-SMART

## THE SAFETY APPLICATION

## MORE SAFETY FOR ISOLATED WORKERS AND OFF-NETWORK GROUPS

The APPI-Smart application works as a natural extension of the APPI-Com radio.

This smartphone application improves the already-robust safety functions of the radio while providing a solution for those who cannot pilot their radio directly (due to the radio being under their hazmat suit, etc.).

## AUTOMATICALLY RELAY YOUR ALERTS

Your team's LWP alerts will be relayed automatically (via Bluetooth) to a predefined contact with the time, date, GPS position, and group name of the immobilized worker.

- Voice message
- SMS
- Email

APPI-Smart protects the whole team and reinforces the contact between workers and their support team.

## USE YOUR SMARTPHONE AS A REMOTE CONTROL

Wearing your radio underneath your PPE?

Thanks to its simple and intuitive interface, APPI-Smart allows you to control your radio remotely.

Manage your incoming calls: Choose to share your conversation with the whole team or keep your call private.

# APPI-LINE

## WIRED INTERCOM WITHOUT RADIO EMISSIONS

In radio sensitive environments (nuclear, ammunition, etc.) or with significant EM perturbations, you cannot use a system that uses radio waves: APPI-Line is meeting these requirements to allow workers to keep in close contact.

Simplicity: APPI-Line embeds the APPI-Com's strengths (compact, waterproof, shockproof) and allows you to connect all your audio devices for full-duplex communication.

The APPI-Line system allows two team members (up to 150m) to communicate in hands-free (full-duplex) mode.
